

OFFICE OF THE PRESIDENT

323 State Street, Augusta, ME 04330-7131 (207) 629-4000 | Fax (207) 629-4048 | mccs.me.edu

October 1, 2020

The Honorable Erin Herbig, Chair
The Honorable Matthea Daughtry, Chair
Joint Standing Committee on Innovation, Development, Economic Advancement and Business c/o Legislative Information Office
100 State House Station
Augusta, Maine 04333

Dear Senator Herbig, Representative Daughtry and Members of the Joint Standing Committee on Innovation, Development, Economic Advancement and Business:

I am pleased to submit the annual report for the Maine Quality Centers as required by statute <u>20-A MRSA §12729</u>. This report includes information on projects active during FY20 (July 1, 2019 to June 30, 2020).

The Maine Quality Centers is a program of the Maine Community College System. The program's statutory mission is "...to meet the workforce education and training needs of new and expanding businesses in the State and provide new employment and career advancement opportunities for Maine people."

If you have any questions or comments regarding this report or the Maine Quality Centers, please do not hesitate to contact Dan Belyea, Chief Workforce Development Officer, at (207) 745-6082 or at dbelyea@mccs.me.edu.

Sincerely,

David Daigler President

Enclosure

Maine Quality Centers Program FY20 Annual Report

Submitted to the 129th Maine Legislature's Joint Standing Committee on Innovation, Development, Economic Advancement and Business

Summary

The Maine Quality Centers (MQC), a program of the Maine Community College System, was created in 1994 by the Maine Legislature to meet the workforce education and training needs of new and expanding businesses in the state and provide new employment and career advancement opportunities for Maine people. The program provides grants to Maine employers to fund customized new-hire or incumbent-worker training delivered by the Maine Community College System.

Since its inception, the program has served <u>279</u> new or expanding Maine businesses, <u>22,548</u> Maine people have been trained for new positions, upgraded skills, and incumbent workers across the state have upgraded their skills.

The program provided support to Maine employers, incumbent workers, and new hires through the following projects which were active between July 1, 2019 and June 30, 2020.

FY20 Project Activity

•	Total active projects in FY20:	83
•	MQC FY20 project expenditures:	\$1,957,074.89
•	Industry match investment:	\$894,645.60
•	Total MQC investment in projects to date:	\$2,851,720.49
•	Total trained as of 06/30/2020:	3,625
•	Total new jobs created as of 6/30/2020:	190
•	Increase over FY19 trained:	126%

An additional 1,349 individuals began training in FY20 that will be completed in FY21. Their numbers will be included in the FY21 report.

Overview and Activities

MQC's statutory mission is "...to meet the workforce education and training needs of new and expanding businesses in the State and provide new employment and career advancement opportunities for Maine people." The statute defines three primary purposes for the program: job creation, workforce preparation and creating partnerships. The program's public benefit is to serve the employer's need for additional skilled workers, give trainees portable work skills to compete in today's workforce, and establish and maintain relationships that support regional economic growth.

The program is managed and coordinated by a Chief Workforce Development Officer, with individual project services delivered by the system's seven colleges. Project funding supports customized training activities, as well as applicant recruitment and screening when appropriate. Most services are provided directly by a community college, although the statute provides for coordination with other education and training providers if necessary. The program's budget for FY20 was \$1,057,919, which included \$534,981 for the Put ME to Work initiative. In March 2020, the Maine Legislature authorized an additional \$2.5 million to the Maine Quality Center grant program in one-time funding, which is currently being used to enhance additional training opportunities for those Mainers who were adversely affected by COVID-19.

The program utilizes five approaches to meeting the training needs of Maine's workforce:

• New-hire training: MQC provides grants to Maine employers to support customized training for new and prospective hires. Projects are selected for funding based on the number of net new jobs, the skill level of the positions, wage and benefit levels, training required, possible return on public investment and other pertinent labor market considerations.

During FY20, MQC provided customized workforce training to some of Maine's largest employers, some of its fastest growing companies, and several new and promising start-ups. A list of businesses served is attached.

Training was delivered across a wide array of industries and in a variety of "hard" and "soft" skills, among them: supervisory skills, leadership skills, MS Office, project management, time management, communication, business writing, lean manufacturing, manufacturing, welding, healthcare, food service, resume building and interview skills, SERV Safe, safety, financial management, electricity, marine design, high-pressure boiler, and first aid/CPR.

• Incumbent-worker training: Based on the need for greater incumbent-worker training options, as identified by the 126th Maine Legislature's Joint Select Committee on Maine's Workforce and Economic Future, MQC began a pilot program in FY14 to provide training to employers' incumbent workers. Employers with over 100 employees pay 50% of the project costs, while employers with employment levels between 51 and 100 pay 25% of costs. No match is required of employers with 50 or fewer employees. Over the past six years, this offering has served 76 Maine businesses, updating the skills of their employees. The demand for incumbent-worker training has increased and this option will continue to be part of the MQC grant portfolio.

- College initiated projects: Community colleges that have identified areas of in-demand training for unemployed or underemployed Maine residents in their communities may also submit applications directly to MQC. A current example of this type of project is Southern Maine Community College's medical assisting, construction institute, and manufacturing technician/welding training projects. MQC grants funded the costs of instruction for these three groups that trained a total of 713 people.
- Put ME to Work: Created in the first session of the 127th Maine Legislature, the Put ME to Work program is designed to address demonstrated training needs for occupations that offer competitive wages and benefits. Projects need to include strong partnerships between business, industry, and the community colleges and require a 50% cash and/or in-kind match by the employer or industry applicant. The first Put ME to Work project, in FY17, was a mechanized logging program with the Professional Logging Contractors of Maine. In FY20, additional programs were added, with Huber Engineered Woods, LLC, LPN Consortium, Mechanized Logging and St. Croix Tissue.
- COVID-19 Projects: Through the Governor's Executive Order dated March 27, 2020, the Maine Quality Center's program implemented 47 new online training programs in the medical and information technology fields. These training opportunities provided Mainers the ability to take programs online, at their own pace, and prepare them to acquire a credential of value. In May 2020 we worked with Hospitality Maine to create and implement COVID-19 Readiness Badging for the hospitality industry and the training was offered beginning on May 26, 2020 and as of June 30, 2020, 2,125 individuals were trained and awarded a micro-credential. The Maine Quality Center is currently working on COVID-19 Readiness badges for Ski Maine, Goodwill of Northern New England, and the Maine Auto Dealers Association. MQC is in the process of developing HVAC training for administrator and maintenance employees of Maine public schools on air handling systems, filter changes, and preventative maintenance procedures. We anticipate these new micro-credentials will train approximately 5,000 to 6,000 unduplicated individuals.

The attached table provides an overview of all MQC projects that received funding in FY20 (July 1, 2019 to June 30, 2020).
